DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 3 and 4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The phrase "a volatile memory" (claim 3, line 6) is unclear. Is this volatile memory the same or different from "a volatile memory" recited in claim 3, line 4. If they are different, the phrase "said volatile memory" in claim 3, line 9 does not clearly refer to which of these two volatile memories.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1, 3 and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Miiller et al..

Miiller et al. discloses a recovery method a memory module and a volatile memory having a redundant memory cell having all the elements and steps as recited in claims 1, 3 and 5 as follows:

- a non-volatile memory (column 2, lines 27-36) for storing a defective row address and a defective column address corresponding to a memory cell in a volatile memory which is determined as defective in an electric test; and
- a volatile memory (column 2, lines 13-14) for holding the defective row address, the defective column address and the defective device information transferred thereto upon start-up of a system ((column 3, lines 46-48), the volatile memory including a redundant memory cell which is accessed instead of the memory cell determined as defective in the volatile memory (column 8, lines 1-3).

Allowable Subject Matter

5. Claims 2 and 6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6. Claim 4 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Art Unit: 2818

Claims 2, 4 and 6 recite the volatile memory comprising a plurality of fuse elements which can be blown out by laser light. The prior art does not teach or suggest this limitation.
